.....

BASIC UNDERGROUND HARD ROCK MINER SERVICE TYPES - COMMON CORE

- U0000** Follow Surface and Underground Induction Procedures
- U0001** Perform General Inspections
- U0002** Scale Loose Rock

The program consists of two computer theory modules that must be completed either on-line or any day Monday to Friday at the NORCAT Training Centre. On the Tuesday following completion of the theory portion, a four-hour practical session is required at the NORCAT Mine. These courses are not transferrable to the Basic Underground Hard Rock Miner Common Core Program.

Once a participant has completed all the theory and hands-on practical training, he or she will receive the paperwork necessary to return to his or her employer in order to be registered with the MTCU.

The contactor is also issued a NORCAT contractor pass, which states they have completed their general orientation training and underground service training.

To register please contact the NORCAT Training Centre.

SUPERVISOR TRAINING

NORCAT presently offers two Supervisor Common Core training programs.

#P770121 Common Core for First Line Underground Mine Supervisors

The three training elements include computer-based training, classroom instruction, and hands-on task demonstrations.

Included in this program are:

- U6100** Follow Safety Program
- U6101** Prepare for Emergencies
- U6102** Follow Health and Hygiene Procedures/Guidelines
- U6103** Practice Effective Communication
- U6104** Manage Work Area Activities
- U6105** Manage Employees
- U6106** Read and Follow Mine Layouts and Specifications
- U6107** Identify Geological Features and Supervise Ground Control Installations
- U6108** Assess, Control and Apply Ventilation Systems in Workplaces

Pre-requisites:

To be registered in Program # 770121 you must have:

- A current, standard level Workplace Safety and Insurance Board of Ontario (WSIB) approved, first aid certificate; and
- Full Basic Underground Hard Rock Miner Common Core accreditation, Program #770010. Modules U0000 to U0012.
- Meet OHSA requirements for competent person.

It is the candidate's responsibility to inform the local Apprenticeship Client Services office of a change of name, address or transfer to a new employer and provide documents as required for registration.

To be accredited in the Underground Hardrock Mining First Line Production/Development Supervisor Common Core Program, the employee **must have demonstrated competency** in each of the above 770121 Program Modules.

Courses are delivered over a minimum three month period with one week each month for classroom and field instruction. A final complete audit & exam is required after four to six months on the job.

#P770141 Common Core for Generic Supervisors

The three training elements include computer-based training, classroom instruction, and hands-on task demonstrations.

Included in this program are:

U6300 Follow Safety Program

U6301 Prepare for Emergencies

U6302 Follow Health and Hygiene Procedures/Guidelines

U6303 Practice Effective Communication

U6304 Manage Work Area Activities

U6305 Manage Employees

U6306 Assess, Control and Apply Ventilation Systems in the Workplace

Pre-requisites:

- A current, standard level WSIB approved first aid certificate.
- As a minimum, MTCU accreditation in the mandatory modules from the appropriate common core program 770130, 770150, 770210 or 770225.
- Meet the requirements for 'competent person' as defined in the OHSA legislation.

It is the candidate's responsibility to inform the local Apprenticeship Client Services office of a change of name, address or transfer to a new employer and provide the required documents for registration.

To be accredited in the Generic Supervisor Common Core Program, the employee ***must have demonstrated competency*** in each of the above 770141 Program Modules.
