

# Site Access System and RFID

Ensuring that contractors working on your property are trained according to relevant legislation and your site-specific procedures are vital for meeting training requirements and creating a safe work environment.

We provide turn-key training, site access and security solutions for industry. With the swipe of a card, NORCAT's Site Access System allows the individual access to the site and the security RFID system allows for tracking of vehicles, property and contractors while on property.

## Site Access Kiosk features include:

- Training tracked through site access cards
- Training expiration reports
- Allows for employer updating and contact notification
- Location requirements
- Instructions for non-compliance

## RFID features include:

- Vehicle, individual and asset tagging
- "Currently on property" and company traffic reports
- Controlled mechanical entry
- Emergency vehicle tagging and auto-entry
- Restricted individual notification

For additional features and to see the Site Access System in action, visit [www.norcat.org/site-access-system.html](http://www.norcat.org/site-access-system.html)
