

# Realistic Extinguisher Safety.

FiAR is the world's first augmented reality (AR) fire extinguisher training tool delivering a whole new level of realism and learner engagement. Set yourself apart. Harness the realism and accuracy of FiAR ensuring that learners experience a one to one application of real world fire extinguisher training experiences.

Everything seen included\*  
Device charging units included. 110-120v 60hz  
\*Note: cost for FiAR device.

Everything you need to deliver the best fire safety training experience, wherever you go.

We sought to keep all the working parts to a minimum delivering an exceptionally light-weight mobile friendly package for wherever your training takes you.

## More Power, Less Hastle.

Ignite and extinguish realistic fires with FiAR. Jump right into a preset fire, or scan your environment and create your own fire scenarios. Fully customizable including temperature (celcius, farenheit, and kelvin) flash point control, fire safe distance and more.
